

Director of Computer Forensics & Cybersecurity

Digital Mountain is a dynamic, Silicon Valley-based company in the high growth and fast changing area of computer forensics, cybersecurity and electronic discovery. We are seeking a Director of Computer Forensics & Cybersecurity to be part of our energetic, fun, collaborative and hard-working team. The company is privately held and has customers among the largest law firms, corporations and government organizations in the United States. Most travel is local.

Technical Skills

- Ability to edit and provide technical input on forensic reports
- Strong technical experience working with desktops, laptops, servers and enterprise-level systems
- An understanding of various Windows-based file systems
- Background working with smartphones
- Background working with different levels of RAID (0, 1 & 5)
- Proficient in the use of EnCase, FTK, IEF and other mainstream forensic tools
- An understanding of proper data collection techniques and documentation
- Must have the ability to learn new tools and technologies
- Flexibility to work on electronic discovery matters when needed
- Mac forensics experience is a plus
- Linux and Unix experience is a plus
- Solid working knowledge of Office 365 and electronic discovery workflow is a plus
- Security log analysis and cyber experience is a plus

Background & Certificates Required

- Minimum of five years of computer forensics and/or cyber experience
- Strong leadership and coaching skills
- EnCE, CFCE or equivalent certification
- Experience working on civil cases in a billable role is a plus
- Expert witness experience is a plus
- Law enforcement or investigative experience is a plus
- History of providing presentations at industry conferences and/or tradeshows is a plus
- Computer science degree is a plus

Performance Skills

- Ability to manage several projects at a given time under tight timelines
- Ability to describe complex technical concepts to lawyers in simple terms
- Ability to work with clients in a consultative approach with flexibility on collection methods used based on the goals of the case
- Excellent written and oral communications
- Must have strong problem solving and trouble-shooting skills
- Must be committed to achieving results under tight deadlines
- Must be able to work within a team and be flexible
- Must be able to prepare and proofread reports

Compensation is commensurate with the experience. Candidate will be based out of our headquarters in the Silicon Valley. This is in-house, not a remote position. No relocation will be provided. To apply for this position, please send an email with resume attached to jobs@digitalmountain.com.
